President of Baghdad University Receives Korean Ambassador and his Delegation in Iraq

Mr. President of the University of Baghdad Prof. Dr. Alaa’ Abdulhussein Abdulrasul received the Korean Ambassador Hyun Myung in Iraq and his delegation, which included Mr. Kwok Park President of the Korean Foundation of Advanced Studies and a number of diplomats at the Korean Embassy. Mr. president welcomed the guests and presented a brief overview about the history of the University of Baghdad and its colleges and the number of students in the undergraduate and postgraduate studies, and the size of faculty members and administrative staff.

The Korean ambassador and Korean head of the institution referred to the good relations between Baghdad University and Korean institutions and the Memorandum of Understanding signed in 2011 and offered their sincere thanks for the warm reception. President of the Korean Foundation of Advanced Studies has suggested the foundation of Center for Asian Studies, which includes various sciences where this institution includes 17 centers in East Asian countries, pointing out that there are a number of Korean universities looking to sign memorandums of understanding with the University of Baghdad. An invitation was directed to Mr. President of the University of Baghdad to visit the mentioned institution in addition to visiting Korean universities and Mr. president promised to study the project and submitted it to the University Council and the Ministry for the purpose of making the right decision regarding the implementation of the project, thanking at the same time the Korean Ambassador and President of the Korean Foundation for the invitation and promised to accept it on the proper time. Both Assistant president of Academic Affairs Dr. Alaa’ Karim Mohammed and Dr. Sabah Mohammed Abbas, the director of cultural relations at the university attended the meeting.
Strategies and development projects in the University Council

Reason and wisdom are what prevails university councils to make scientific and administrative decisions in the university which extends to more than a century of experience and reason, these experiences serve first and last human progress in the service of society, so the regular meetings carried out by University councils and their academic colleges and institutes to make the right and discreet decisions to support the education process and push it forward to rise to the highest and most prestigious levels in the world and not only in Iraq. At a blessed meeting of the University Council, held at the University headquarter Al-Jadriya and all members of the Council under the chairmanship of Prof. Dr. Alaa’ Abdulhussein University President, Dr. Bahaa Toma Jiyad, administrative assistant, Dr. Alaa’ Mohammed Kareem scientific assistant and deans of colleges, institutes and scientific centers and assistant professor Dr. Bassem Al-Abdali Secretary University Council are attended, the Council addressed the most important issues that would raise the level of education. The Secretary of the University stated to the website team that the meeting discussed the plans of admission to graduate students of the next year, God willing, 2013-2014, to be according to the level that meets the actual need of the requirements of the market and the Iraqi society, and the issues of Graduate Studies in the provision of all equipments and developed laboratory devices, and updating the existing old science laboratories, also the theme of extending period of study of the students and urged them to complete their research according to the prescribed and identified period of the study, and try to reduce and minimize the extension requests of graduate studies, which overweight the university. The meeting addressed plans for admission to the students of the undergraduate study and the evening study, and discussed the establishment of new scientific and humanity departments in the colleges and institutes for the next year, God willing, and provide all the supplies and materials from science laboratories, equipments and materials and development galleries, and re-opening of the college of Planning has also been discussed and the development of Tourism and Hotel Management at the college of Administration and Economics, after tourism has been improved in Iraq, and the urgent need for tourism and hospitality; preparations for the celebration of the university day, which will be, God willing, in April has been discussed also. Among the important issues discussed by the university council is the tremendous progress of the University’s website, which exceeds more than 18,000 international Universities, and the adoption of electronic correspondence, email via the Internet, in order to provide the services without any delay of time. The president of the university during a meeting of the Council stressed the need to expedite the provision of scientific atmosphere at the University and adopt the advanced and developed curricula and find ways to develop education objectively. The Website team has documented the council meeting with a set of photographs.
Our Scientists Discuss Theses of Reconstruction of the Country

The university started off again in a new circle of social networking through its studies and scientific theses, to codify its ideas and approaches of life by advanced formula rather than the abnormal circumstances and conditions that Iraq is going through, it achieves a lot of humanitarian gains of the society in its constructive planning and philosophical theses in construction - new construction, root construction, modernism that keeps developments and situations in advanced and developing countries worldwide.

It relies on our university scientists and its researchers and thinkers to have generations capable of building a society according to a balanced rhythm of, through superior academic studies and that is processed in the humanity reactors of the University that excels nuclear reactors in its achievement of capabilities and capacities in the engineering and reconstruction of infrastructure in Human and society according to the modern and advanced image. Perhaps, the discussions of the studies and scientific theses give a lot of constructive ideas to the society and humanity, because of its advantages of the intellectual depth and the studies of the phenomena and nature. Among the discussions that help society with important gains: about the care and maintenance of historical and archaeological religious cities, a doctoral thesis of Ali Daoud Al-Attar in the Department of Architecture at the college of Engineering at the hall of Mohammed Makiya for his entitled research "cultural invariable and variable and its impact on the sustainability of religious cities " and under the supervision of Prof. Dr. Saba Jabbar Ni'ma and the discussion committee consisted of Prof. Dr. Bahjat Rashad Shaheen the president and the membership of Prof. Dr. Khalil Ibrahim Ali , Prof. Dr. Sana' Sati' Abbas and Prof. Dr. Luay Mulla Howeish, as well as another study of the feasibility and importance in the development of industrial work and feedstock, entitled "trials and evaluation of the virtual block and roughness of the particles of accelerated solid in Newtonian and non-Newtonian fluids ", as it has been completed of the doctoral thesis of the student Hussein Yousef in the Department of Environmental Engineering at the Hall of discussions in the department and under the supervision of Prof. Dr. Abbas Hamid Salimon and Prof. Dr Adel Obeid Sharif University of Surrey in Britain, the thesis has got excellent, and the discussion committee consisted of Prof. Dr. Abdul Halim Abdulkareem Mohammed as president and the membership of Dr. Majid Hameed Ibrahim, Prof. Dr. Nejdet Nash'i Abdallah, Dr. Yassin Khudhair Salman, and Assistant Professor Dr. Wadood Taher Mohammed.

To take advantage of these scientific theses we display some data or details about them for the benefit of the researcher in our university, Baghdad University, or the other Iraqi universities, to make the university always in the service of society, the Website team has documented these discussions with a set of photographs.
Vice President Khudhair Al-Khuzaie Honors our University

Because the presidency of the Republic of Iraq is keen and believe in science and its role in the progress of peoples, it gives a great importance to science and scientists and Iraqi scientific institutions, where it pays much attention to universities and follow-up all the activities and events of the university and even it contributes to the development and support of all scientific and advanced projects for the service of the Iraqi society and because the Presidency of the Republic of Iraq is integral part of Iraqi society, it contacts with science and scientists continually, from here it followed up and supported the activities of our university, especially our university website which often carry with it in order to communicate scientifically and intellectually, where it seeks to develop work through science and advanced academic research.

What the University of Baghdad did in the development of websites forms an uprising and intellectual reflection in the field of development and international progress to give large signals and signs that the university stands on its feet again and provides a model for the world in the development and human progress, this progress wouldn't see the light only after good and large efforts taken by the university, including the development of staffs of the university and training programming and writing texts, graphic and administration of websites, so University deliberately held advanced and typical training courses in the development of websites, the most important courses was an intensive training course of 2-17/12/2012, for the graduation of golden group who are able to fit all the activities and events of the formations of the University, and display them in the websites using modern scientific system.

The university held a ceremony of the graduation of this group and with a follow-up of Prof. Dr. Alaa Abdul-Hussein University President, where he recommended that this course will be typical by all standards to raise the university to the highest levels, as well as supported by Prof. Dr. Bahaa Tuma Jiyad, Administrative Assistant of the President of the University, who was keen to set a specialized curriculum to train and develop staffs of websites. He attended the graduation ceremony for the distribution of graduation certificates and awards to the outstanding students. The ceremony was held at the Hall of Continuing Education of the college of Science, Al-Jadiriya and with the presence of all the participants of the course and some of the employees of the Republic Presidency. The celebration began with a verse from the Glorious Quran recited by one of the participants of the course, and then the teacher assistant Bassim Hameed, Director of Website delivered a speech noting the building and evolution stages of the website and the ranks obtained, and then administrative Assistant delivered a speech greeting the efforts of workers of this course praising the faithful efforts and explaining what websites play in business development and scientific upgrading and its great capacity. Coincide with the celebrations of Baghdad; the capital of Culture Dr. Kadhem Omran delivered a poem of beloved Baghdad praising its beauty. Then awards were given to the participants and a gift of Dr. Khudhair Al-Khuzaie Vice President was given to the University of Baghdad, which was provided by a representative of the office of Dr. Khuzaie, and carriers greetings and blessings of MP to the University and for the progress that characterize the university and scientific developments, stressing the keenness of Mr. Vice on the development and progress of the Iraqi universities among international Universities.

The website team offers a gift to Dr. Alaa Abdul-Hussein University President and with the presence of Mr. Ahmed, head of scientific affairs and teacher assistant Abdul Kareem Mounir Director Office of President of the University, the university president expressed his happiness of this scientific victory noting that the University of Baghdad represents a great symbol of human civilization due to its reputation and capabilities by virtue of originality and scientific greatness, and most universities and scientific institutions pay attention to our university especially in conferences and scientific events, because of its broad and good reputation among communities and prestigious universities, so we have to maintain and develop our university, through innovation and through diligence, follow-up and accuracy of work, and I am confident that our capabilities exceeds what we are now, and what we got of the ranks is a stage, there must be more advanced new stages, God willing the coming days will witness more of progress, development and the improvement in performance.

During a meeting of website team with the president, editor of website explained that there are more plans and programs developed by the website of the work, and according to a strategy to lead our university and be the top in front of major universities in the world, there are also a number of new packages to be set off by the website, and that the university is on track to big strategy to gain Universal deserve according to classifications and regional and global calendars. We have more capabilities and energies that we can support to new progress and development, at the same time the director of website confirmed the efforts made by the website has achieved and will achieve a number of victories, and we have more stages and measures the website works to develop a work and administration according to a non-traditional approach, to be able to progress and development and compete with major international universities.
